Carnarvon
Town of the never ending summer.
Town of spaceman, aliens and bananas.
The Carnarvon Tracking Station was built to support NASA’s Gemini, Apollo and Skylab programs. Commissioned in 1964. Operated for 11 years.
The OTC Satellite Earth Station, now the museum site, is 6 km from Carnarvon and 4 km north of the Tracking Station. Allow an hour or two to look through. Carnarvon has over 180 banana plantations. I think every household owns a dog in a backyard. Walking a few street blocks with constant barking dogs.
