Marble Bar
A town of less than 200 people in the Pilbara region of north-western Western Australia. The famous Jasper rock outcrop can be seen along the Coongan River near town. The Comet Gold Mine has an interesting museum 7 km out of town. The most famous building in the town is the Ironclad Hotel built in the 1890s, constructed of corrugated iron. Several large gold nuggets were discovered in the area. The 413 ounce Bobby Dazzler. Found in the 1890s. I used a White’s gold detector a few ks out of town in a dry creek bed. No finds. Claimed to be the hottest town in Australia.
